1 Abstract

This is a Sample Abstract of the Viral Project.

2 User Problems & Basic Solutions

This is a Sample Problems of the Viral Project.

3 Vision Statement

To bring blockchain & crypto adoption to the masses we would got to bridge social communication with defi and tokenised economy. The Viral Network of Applications standards are designed in such a way that our vision to bring an proficient, user-friendly mobile application will combine several divisions of decentralized protocols that can lead to an ultimate tool for crypto acknowledgement. The divisions which we are focussing to rebuild is listed

Social Media

1. To create a Real-world Decentralised Social Media
2. To construct an Autonomous self-evolving platform
3. To construct an Interactive Next-Gen Social Media
4. To form a clean people-owned platform appropriate for all age groups
